WORK EXPERIENCE

Portfolio Site
kondashiva.github.io

2019
Made a Portfolio site for myself by using HTML, CSS , JQUERY , JAVASCRPIT for Front End. This site is devolved with an idea of showcasing my frond end skills. This site is flexible to view in any display size and resolution.

Lovely Eaters
Front-End Website

2018
A site developed on an idea of mine where the freshmen of Lovely Professional university find difficulties to get food from the various shops available in the campus, my site shows what stalls available and what food they provide with cost and real time rating system for making students understand which stall is better. Used front end languages and php for back-end.

Pizza Hut Management System
C++ Project

2017
This is project devolved on C++ programming language for owner to manage pizza orders , availability of particular pizza , total selling, total orders. concepts used were file management system,input output method and functions.

Site for Indian Gaming Community
In Progress

2019 – Present
A full dedicated website for Indian Gaming Community which has everything related to gaming such as PC building,stats comparison, community servers, streaming related comparisons etc. Languages used to make this site were Front end languages and python and its framework Django for database and bank-end related works.
